

EVENTS

BEHAVIORAL RESEARCH: SOFTWARE, HARDWARE TOOLS AND SERVICES

Albert Willemsen and Wouter Van de Velde will present the topics of Behavioral Research from Noldus Information Technology company. They will provide the basic information about the core activities and field of work. Products including software, hardware tools, and services will be presented. Furthermore Mr. Willemsen and Mr. Van der Velde will show practical examples of using software tools as the Observer XT and FaceReader.

IEEE Membership Benefits will then be discussed and the range of research outreach, like IEEE Transactions on Affective Computing (Impact Factor 4.585). The *IEEE Transactions on Affective Computing* is a cross-disciplinary and international archive journal aimed at disseminating results of research on the design of systems that can recognize, interpret, and simulate human emotions and related affective phenomena.
